HackTrix Hackathon

- Special Mention
- echoAR track winner for the best use of Augmented Reality technology

Project mentioned on EchoAR inspiration page

JUNE 2021 — JUNE 2021

Projects

Elixir

- An app made for people to get in touch with medical professionals in the recent times where there is a pandemic crisis.
- Project won First Prize in HackYuva competition and Best health Hack in SynthHacks

SafeLink

- This is an app made for women who feel unsafe travelling alone at night. The person only needs to utter a catchphrase that they set themselves in the app when they feel unsafe and text will be sent to people they mentioned in the app.
- App won the First Prize at GeeksForGeeks Hackathon.

StudBud

- In the recent times where everything is online, the app studbud provides students with an Augmented Reality experience of their classes(Labs) so that they can understand it better.
- The Project won Honorable Mention award at SRM Hackathon 5.0

ThinkArt

- This mobile app will provide an augmented reality view of the painting that a person is trying to purchase in the app. Also this app will have a live auction with Ethereum coins that you can earn by Selling/Auctioning the paintings in the app.
